

TAVISTOCK PROFILE 7

MANAGER COMMENTARY

Tavistock PROFILE 7 returned -4.71% in December. The Market Composite Benchmark and the IA Flexible Investment sector returned -5.32% and -4.22% respectively. The profile has a rolling 1-year return of -7.88%.

During the month, the US Federal Reserve's Open Market Committee voted unanimously to raise interest rates by a quarter point and forecast two further rate hikes next year. Jay Powell, Fed chairman, remains very upbeat on the US economy stating he saw no need to reduce the pace of quantitative tightening from the current 'autopilot' setting. Investors, accustomed to a more supportive Fed, had been expecting a more dovish outlook and markets sold-off as a result. In the US, the Nasdaq 100 fell into bear market territory, whilst across the Atlantic, the Stoxx Europe 600 fell to a 2-year low. The US dollar fell against a basket of currencies, pricing in a shallower path for future interest rate rises. The US government yield curve flattened to just 9bps, based on the spread between 2 and 10-year Treasuries, its lowest level in over a decade. Meanwhile, investment grade and high yield corporate bond spreads continued to widen. The risk-off environment, fuelled by concerns over a slowing global economy, drove Brent oil to its lowest level in 15-months, closing at \$50.47 per barrel. The Bloomberg Commodity Index, which reflects a broad basket of commodities, fell -6.72%. Safe-haven assets cushioned against some of the losses. The Japanese yen rose 3.44% against the US dollar and gold has rallied more than 9% since mid-August, finishing at \$1,282.73 per ounce. It has been a very difficult end to the year, and the month of December will go into the history books as one of the most volatile on record. 2018 was a roller-coaster year for bond, equity, commodity and currency markets. For many, it was a timely reminder that after years of nothing-but-positive returns, markets can go down as well as up. Overall, the portfolios performed in line with our high expectations and we are well positioned heading into next year. Wishing you all a successful and prosperous 2019!

ABOUT TAVISTOCK WEALTH

Tavistock Wealth manages over £1bn of assets on behalf of all clients. We aim to provide private clients with access to institutional quality portfolio management at a retail price. Our model portfolios provide individual investors with the benefit of collective buying power to ensure that the charges they incur for model portfolio management, platform fees and dealing are amongst the lowest in the industry. Tavistock Wealth is a subsidiary of Tavistock Investments Plc, the UK wide financial services group. Currently, Tavistock has over 200 financial advisers helping 50,000+ private clients look after more than £3.5bn of investments.

TAVISTOCK PROFILES

The Tavistock PROFILES are risk progressive and designed to cater for the varying risk appetite of different investors. Each PROFILE is comprised of holdings in the risk progressive ACUMEN Portfolios, which invest in highly diversified baskets of ETFs. The ACUMEN Portfolios are constructed and optimised by Tavistock primarily using

INVESTMENT PHILOSOPHY

The fund management industry has experienced significant change in the last quarter of a century. Product innovation has enabled investors to benefit from wider exposure to global financial markets with far greater efficiency and at a lower cost. Index-tracking investments such as Exchange Traded Funds have grown increasingly important and form the building blocks for all of the portfolios managed by Tavistock Wealth. We believe an actively managed, globally allocated, multi-asset portfolio, comprised of low-cost ETFs with diversified holdings in equity, bond, commodity and property markets is statistically more likely to outperform a traditional active manager almost all of the time.

BENCHMARKS

The market composite benchmark (GBP Hedged) is the Bloomberg Barclays Global Aggregate Bond Index (30%) and the iShares MSCI World ETF (70%). The peer group benchmark is the Investment Association's Flexible Investment sector. Benchmark performance is evaluated over a rolling twelve-month investment cycle.
