

ACUMEN CONSERVATIVE

REVOLUTIONARY THINKING

MANAGER COMMENTARY

The ACUMEN Conservative Portfolio (GBP) returned 0.11% in September. The Market Composite Benchmark and the IA Mixed Investment 20-60% Shares sector returned 0.77% and 0.70% respectively. The portfolio has a rolling 1-year return of 5.02%.

US manufacturing contracted for the first time in 3 years in August fuelling concerns further weakness may lie ahead. However, the market mood improved noticeably following upbeat employment data, which grew at the fastest rate in 4 months, and 'non-manufacturing' data increased well ahead of market expectations. In Asia, Carrie Lam, Hong Kong's chief executive, withdrew the controversial extradition bill which had sparked pro-democracy protests across the city-state. The significant de-escalation in political risk sparked a rally in the Hang Seng equity index, setting the tone for the month. The bullish mood spread to developed markets where the MSCI World equity index rose 2.18%. In Europe, the region wide Stoxx 600 index rose 3.60%, led by Italy, following an agreement between the anti-establishment Five Star Movement and the centre left Democratic party. Reduced political risk was also good for the country's bonds. The Italian Treasury took full advantage of the reduced funding costs, selling €7.5 billion of new debt at record levels. It was a different story in the US and Germany, where 10-year government bond yields rose 16bp and 14bp respectively. In the UK, the Battle for Brexit escalated further as the Supreme Court ruled Prime Minister Boris Johnson had misled the Queen by advising her to prorogue parliament. Boris Johnson accepted the ruling but argued it was the wrong outcome for the country. As such it proved a volatile month, for politics and markets, as evidenced by sterling which fluctuated between 1.20 and 1.26 versus the US dollar. In commodity markets, the S&P Goldman Sachs Commodity index rose 1.75%, led higher by the agricultural sub-sector which rose 5.25%. Brent crude rose 0.58% to \$60.78 a barrel and gold fell -3.15% to \$1,472 per ounce.

INVESTMENT PHILOSOPHY

The fund management industry has experienced significant change in the last quarter of a century. Product innovation has enabled investors to benefit from wider exposure to global financial markets with far greater efficiency and at a lower cost. Index-tracking investments such as Exchange Traded Funds have grown increasingly important and form the building blocks for all of the portfolios managed by Tavistock Wealth. We believe an actively managed, globally allocated, multi-asset portfolio, comprised of low-cost ETFs with diversified holdings in equity, bond, commodity and property markets is statistically more likely to outperform a traditional active manager almost all of the time.
