TAVISTOCK WEALTH

ABOUT TAVISTOCK WEALTH

Tavistock Wealth manages over £1bn of assets on behalf of all clients. We aim to provide private clients with access to institutional quality portfolio management at a retail price. Our model portfolios provide individual investors with the benefit of collective buying power to ensure that the charges they incur for model portfolio management, platform fees and dealing are amongst the lowest in the industry. Tavistock Wealth is a subsidiary of Tavistock Investments Plc, the UK wide financial services group. Currently, Tavistock has over 175 financial advisers helping 50,000+ private clients look after more than £3.5bn of investments.

TAVISTOCK GROUP STRUCTURE

The Group has separate investment management and advisory businesses. Tavistock Wealth delivers institutional quality portfolio management at a retail price. Our advisory businesses provide compliance, administration and accounting services to the independent financial advisers (Tavistock Partners) and to financial advice firms (The Tavistock Partnership). Tavistock Private Client is a multi-award winning practice that provides independent financial advice and investment management services to higher net worth private clients.

INVESTMENT TEAM

The investment team is comprised of 8 professionals who collectively manage the risk progressive range of ACUMEN Portfolios and Tavistock PROFILES.

Christopher Peel is the Chief Investment Officer of Tavistock Wealth and carries direct responsibility for all discretionary investments at the firm. Together with John Leiper, CFA, Head of Portfolio Management, and the portfolio management team, they co-manage the risk progressive range of ACUMEN Portfolios (UCITS funds) and the Tavistock PROFILES (model portfolios). Christopher is an economics graduate with more than 30 years' experience in financial markets, managing both multi-asset traditional and alternative funds, having held senior management positions at both Citibank and Salomon Brothers. John has over 10 years' experience in the investment management industry and is a CFA® charterholder.

INVESTMENT PHILOSOPHY

The ACUMEN Portfolios invest in exchange traded funds (ETFs) with diversified holdings in equity, bond, commodity and property markets. The ACUMEN Portfolios form the building blocks for the risk progressive Tavistock PROFILES.

The ACUMEN Portfolios and Tavistock PROFILES are managed to Dynamic Planner's expected volatility range and relative to their respective market composite benchmarks.

INVESTMENT PROCESS

The investment process is grounded in rigorous quantitative and qualitative techniques, based on top-down global macro-economic analysis drawing on in-house expertise and external research. Whilst the investment rationale is driven by broad fundamental trends, technical analysis also features in the decision making process.

THE SIGNIFICANCE OF CURRENCY HEDGING

When are clients subjected to currency risk?

- Whenever they are invested in a globally diversified portfolio
- Whenever they own assets denominated in a currency other than GBP

What is the risk to the portfolio?

- Returns are driven from the currency markets, not from the asset allocation
- Strategy upon which portfolio is marketed can be made redundant
- Volatility of portfolio becomes misaligned with client's ATR profile

What is the risk to the client?

- They are subjected to the movements in currency markets when they are not expecting it
- May subsequently lose money when expecting to make gains (or vice versa)
- They are subjected to unexpected levels of volatility
- May be experiencing 'Risk Profile 8' volatility when recommended a 'Risk Profile 5' portfolio

What is the risk to the adviser?

- By not mentioning currency risk when recommending a global portfolio:
 - Risk of poor advice regarding the driver of a client's returns
 - Risk of poor advice regarding the volatility a client is exposed to
 - Risk of complaints in relation to both of the above
 - No defence for insufficiently explaining the risks at the outset
 - No defence for failing to match a portfolio to a client's needs
 - No defence for not monitoring the ongoing volatility of a portfolio

INVESTING IN THE TAVISTOCK PROFILES

Baskets of ETFs constructed by Tavistock primarily using

- Market leading range of ETFs

Mitigation of foreign exchange risk through currency hedging:

- Ensuring asset allocation is the driver of returns (rather than currency moves)

Managed to the European regulatory gold standard - UCITS Compliant:

- Investment safeguards continually protecting client holdings

Managed to Dynamic Planner's expected volatility range:

- Volatility bands that match the attitude to risk profiles of individual clients

Tavistock PROFILES are managed to Dynamic Planner's expected volatility range and relative to their respective market composite benchmarks. In order to remain within the defined volatility ranges, the Tavistock PROFILES hedge their overseas currency exposure back to sterling. If overseas exposure is not hedged the currency markets will impact the returns of the portfolio, and more importantly, the level of volatility the portfolio takes.

TAVISTOCK PROFILES (TP) RISK vs RETURN

Tavistock PROFILE 3

INVESTMENT OBJECTIVE

The investment objective of Tavistock PROFILE 3 is to deliver long term capital growth by investing in a range of global financial markets. The portfolio is typically comprised of lower and medium risk investments such as cash, bonds and property, as well as higher risk investments such as equities and commodities.

RISK PROFILE

Tavistock PROFILE 3 is defensive and targets a risk profile of 3 on a scale of 1-10, which can be characterised as “low end of cautious to moderate risk”. The PROFILE is managed to Dynamic Planner's volatility range of 4.20% to 6.30% and has a blended allocation to the range of ACUMEN Portfolios.

INVESTMENT PHILOSOPHY

Asset allocation, rather than stock selection, is the key driver of risk and returns and the Tavistock PROFILES are structured accordingly. Each portfolio is comprised of holdings in the risk progressive ACUMEN Portfolios, which invest in highly diversified baskets of ETFs providing cost effective and tax efficient exposure to global markets. The ACUMEN Portfolios are constructed by Tavistock primarily using

MANAGER COMMENTARY - JUNE 2019

US manufacturing contracted for the first time in 3 years in August fuelling concerns further weakness may lie ahead. However, the market mood improved noticeably following upbeat employment data, which grew at the fastest rate in 4 months, and 'non-manufacturing' data increased well ahead of market expectations. In Asia, Carrie Lam, Hong Kong's chief executive, withdrew the controversial extradition bill which had sparked pro-democracy protests across the city-state. The significant de-escalation in political risk sparked a rally in the Hang Seng equity index, setting the tone for the month. The bullish mood spread to developed markets where the MSCI World equity index rose 2.18%. In Europe, the region wide Stoxx 600 index rose 3.60%, led by Italy, following an agreement between the anti-establishment Five Star Movement and the centre left Democratic party. Reduced political risk was also good for the country's bonds. The Italian Treasury took full advantage of the reduced funding costs, selling €7.5 billion of new debt at record levels. It was a different story in the US and Germany, where 10-year government bond yields rose 16bp and 14bp respectively. In the UK, the Battle for Brexit escalated further as the Supreme Court ruled Prime Minister Boris Johnson had misled the Queen by advising her to prorogue parliament. Boris Johnson accepted the ruling but argued it was the wrong outcome for the country. As such it proved a volatile month, for politics and markets, as evidenced by sterling which fluctuated between 1.20 and 1.26 versus the US dollar. In commodity markets, the S&P Goldman Sachs Commodity index rose 1.75%, led higher by the agricultural sub-sector which rose 5.25%. Brent crude rose 0.58% to \$60.78 a barrel and gold fell -3.15% to \$1,472 per ounce.

GLOSSARY OF TERMS

ANNUALISED RETURN

The annualised return of the portfolio since inception.

VOLATILITY

Standard deviation is a statistical measurement which, when applied to an investment fund, expresses its volatility, or risk. It shows how widely a range of returns varied from the fund's average return over a particular period. Low volatility reduces the risk of buying into an investment in the upper range of its cycle, then seeing its value fall towards the lower extreme. For example, if a fund had an average return of 5%, and its volatility was 15, this would mean that the range of its returns over the period had swung between +20% and -10%. Another fund with the same average return and 5% volatility would return between 10% and nothing.

While volatility is specific to a fund's particular mix of investments, and comparison to other portfolios is difficult, clearly, for those that offer similar returns, the lower-volatility funds are preferable. There is no point in taking on higher risk than necessary in order to achieve the same reward.

DOWNSIDE RISK

Downside risk is a measurement which only looks at negative returns. It represents an estimation of the potential loss in negative market conditions. It could be considered as an estimate of the potential loss on any investment. Semi-deviation observes values that have a result below that of the mean.

MAX DRAWDOWN

Represents the worst possible return since inception. E.g. Buying at the maximum price over the period and selling at the worst.

MAX GAIN

Represents the best running return since inception. E.g. The longest running consecutive gain without making a loss.

MAX LOSS

Represents the worst running return since inception. E.g. The longest running consecutive loss without making a gain.

NEGATIVE PERIODS

Indicates percentage of negative monthly returns.

POSITIVE PERIODS

Indicates percentage of positive monthly returns.

MARKET COMPOSITE BENCHMARK

An index based on pre-determined weights, composed of equities, bonds or any combination of asset classes, whose value is measured and used for comparative performance purposes against the Tavistock PROFILES.

THIS DOCUMENT IS ISSUED BY TAVISTOCK WEALTH LIMITED AND IS FOR USE BY FINANCIAL ADVISERS ONLY. IT SHOULD NOT BE RELIED UPON BY A RETAIL CLIENT. This document does not constitute an offer to subscribe or invest in the Tavistock PROFILES nor buy or sell shares in the ACUMEN Portfolios. The ACUMEN Portfolios are sub-funds of the ACUMEN OEIC. The Prospectus is the only authorised document for offering shares in the ACUMEN Portfolios and investors are required to read the Key Investor Information Document (KIID) before investing. Documentation is available free of charge at www.ifslfunds.com or by calling 0845 1231084. Tavistock Wealth Limited does not provide investment advice. This document may not be reproduced, disclosed or distributed without the prior written permission of Tavistock Wealth Limited. iShares® and BlackRock® are registered trademarks of BlackRock, Inc. and its affiliates ("BlackRock") and are used under license. Further, BlackRock, Inc. and its affiliates including, but not limited to, BlackRock Investment Management (UK) Limited, are not affiliated with Tavistock Wealth Limited and its affiliates. Accordingly, BlackRock makes no representations or warranties regarding the advisability of investing in any product or service offered by Tavistock Wealth Limited or any of its affiliates. BlackRock has no obligation or liability in connection with the operation, marketing, trading or sale of any product or service offered by Tavistock Wealth Limited or any of its affiliates.

The value of investments held in the Tavistock PROFILES may fall as well as rise. Past performance should not be seen as an indication of future performance. The rolling 1 year dividend yield is quoted as of 30th September 2019 (applicable to income share class only). The Tavistock PROFILES are a white-labelled offering based on the DFM Portfolio Management Service provided by PB Financial Planning. PB Financial Planning is a trading style of Tavistock Private Client Limited, which is authorised and regulated by the Financial Conduct Authority. The PROFILE returns are quoted net of fees and the inception date of the PB Financial Planning DFM Portfolio Management Service is 18/02/08. All Tavistock PROFILE performance data up until 31/12/16 has been provided by PB Financial Planning. As of 01/01/17, all Tavistock PROFILES invest in a blend of the ACUMEN Portfolio range. All performance data thereafter is provided by Tavistock Wealth Limited. The Market Composite Benchmark was amended on the 30th June 2019, data is therefore live from this date. Data prior to this date is the historical Market Composite Benchmark information which is available upon request or can be sourced via previous versions of this document. Source of data: PB Financial Planning, Tavistock Wealth Limited, Thomson Reuters and Lipper for Investment Management unless otherwise stated. Date of data: 30th September 2019 unless otherwise stated.
